DETAILED ACTION

Applicants' preliminary amendment filed July 14, 2000 is acknowledged and has been entered. Claims 1-9, 11 and 13-17 have been canceled. Claims 10 and 12 have been amended. New claims 18-31 have been added. Claims 10, 12 and 18-31 are now pending in the present application.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 10 and 18-24, drawn to a vaccine (gene therapy vaccine), classified in class 514, subclass 44.
- II. Claims 12 and 25-31, drawn to a method of inducing immune protection by administering recombinant gene expression vector, classified in class 514, subclass 2.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product, vaccine (i.e. expression vector) can be used for probes or primers or in the synthesis of dnaJp1 peptide; the method could be used in another materially different expression vector for inducing immune protection.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nita M. Minnifield whose telephone number is 703-305-3394. The examiner can normally be reached on M-F (8:00-5:30) Second Friday Off.
